Quick learner
Team building

OBJECTIVE

To secure employment with a reputable company,where I can utilise my skills and apply them practically in a productive way.

PROJECTS

Clinical data analysis and management system

This project deals with the management of patients records in an hospital and retrieval of the clinical data that reduces redundancy as well reduces health care system.

Guess number game using React

In this game, the player need to guess a number between 1-100,which should match to the number that is generated randomly by the system.After every guess ,it tells that the guessed generated number is greater or lesser to the randomly generated number,based on that he can guess the number in his next chance. For every wrong guess the player looses his score by 2 and the user will have 5 chances to guess the number.

Cart app using React

In this online shopping project, it displays products and their details. we can add products to the cart and remove and based on the items in the cart total price will be calculated.

Quiz using react

In this project, 5 multiple answer questions will be displayed. And for every wrong answer marks will be reduced by 1 and the total score will be displayed at the end.
